Subject: FOUR GENERAL TYPES OF SOULS

The following information was added to Destiny of Souls about a year after the first edition. Starting sometime in 2001-02 it would appear on Page 315. I include this in the TNI archives because it did not appear in the early edition. Also, be aware that because of a re-print problem at Llewellyn publishers the Index to Destiny of Souls had to be completely re-done in 2004. I suspect the first editions with this new Index did not appear until 2005.

There are four major types of souls I have encountered within the community of spiritual life. There must be many more than these four general categories of souls, however, I am limited by the memories of my still incarnating clients concerning other possible soul types in the spirit world.

1. Souls who are either unable or unwilling to function individually. These souls usually work within collectives and never seem to leave the spirit world. Even so, I am told that all souls are given the opportunity to experiment with an existence in both physical and mental universes.

2. Souls who do not wish to incarnate in physical form. Also, they may not possess the requisite properties of light energy to engage in this activity. They seem to work only on mental worlds and appear to move easily between different dimensions. Most of their talents are beyond the comprehension of my clients.

3. Souls who incarnate only on physical worlds. I sense that some have the capability for training in mental spheres between lives, but are not inclined to do so. They are not attracted to interdimensional travel, even during recreation. Quite a number of my clients are in this category.

4. Souls who have both the ability and desire to function in all types of physical and mental environments. This does not necessarily give them more enlightenment than other soul types. Yet, their wide range of practical experience and capabilities position them for many specialization opportunities involving varied assignments of responsibility.
