Subject: Cosmic examination of events in a timeless world.

Dear interested members:

Since my posting of Cosmic Philosophy, that included book lists, some of you have contacted me asking the following question: "Besides inter-dimensional inquiries by our soul/clients, just what other cosmic aspect of our work gets the most attention from both the public and our clients?" Thinking back to my years of working with the public and seeing clients I would have to say the answer is, Spacetime. With this kind of metaphysical information involving "now time" in our work we should strive to try and explain the concept clearly and shall I go so far to also say, simply! This is the objective we strive for anyway. So, with your indulgence, I would like to set down a few thoughts.

I remember with my clients and at public lectures the queries on Spacetime often began with my needing to explain that no event in their incarnations on Earth ever really dies and, in fact, when they return to the spirit world after a life events can be reviewed with the soul's active participation. This idea is especially relevant with thoughts from people about time spent with loved one's who have passed on. Now, how can we begin a proper discussion of this subject? Currently, Spacetime physics tell us that physical (or say, environmental) events represent different configurations of mass and energy. Thus, different Spacetimes have different shapes and properties that make them individually distinct or unique from each other. This comment lays the foundation of "now time."

We know that in the spirit world the recreation of events on Earth are used for karmic reviews and learning. The "reality" of a past incarnation can become again the reality of a disembodied spiritual entity for study. At least for souls who have been human beings on planet Earth, or on other physical planets in our universe; past, present and future exist side by side. I think of the future as a resonance of possible energy wave shapes that are influenced by both past and present. This factors in an established past and the higher probabilities of present Spacetime sequences.

The closer in time that event sequences take place, the greater probability—or chance—that certain events will happen and become "real" as far as say, human conduct is concerned. The spirit world for human souls at least is essentially "now" time and this means past, present and future exist side by side are available for our study and review between lives. In my last posting I mentioned the scientific author, Dr. Fred Wolf. He says: ".... the waves of time must be different from a one-way river. Events that have passed must still be around (because energy never dies) and events that will be must exist like boulders behind blind corners of the streams of life." He feels that, "quantum waves contain past, present and future move backward and forward in a river of time." Not bad for a guy who probably knows nothing about LBL!

On our world it seems to me that the closer in time that event sequences take place the greater the probability of a certain sequence of events will occur as far as human conduct and thus become "real." I have tried to explain timelines and body choices with regard to "now" time on page 361 in *Destiny of Souls*. But, I would like to mention another page, 169 involving a case. In the spirit world you can't change your past by a second-time around visitation but these events can be re-created for both participation and study.

What appears as endless time sequences to an outsider also appears as endless space. But to an insider, within the bubble of a timeless spirit world between lives, each moment in time is preserved.

Probably what I have said isn't needed at all by our members.....but thank you anyway.....Michael

Subject:

POSSIBILITIES VS. PROBABILITIES IN SPACETIME

I have three other papers on this subject in the folder on Cosmic Examination of Events in our lives. However, I wanted one larger paper with additional details for a more complete picture of this phenomenon in terms of LBL. The shorter versions might be useful but this subject, involving Timelines and Body Choices, is also reviewed on Pages 360-61 in *Destiny of Souls* and is worthy of expansion. My research has always indicated that no event in our lives ever really dies. On Page 169, also in *Destiny of Souls*, Case # 30 illustrates the awesome implications of my conclusions where a schoolyard bully becomes the victim in a between life scenario. He was made to feel the pain and anguish he inflicted upon another boy in his most immediate past life where karmic justice eventually comes full circle. My client stated this was not like watching a movie of his past life but rather the scene was live and he was in it rather than simply recreated in his mind. There are more extreme examples. I have had subjects who were German soldiers during the Holocaust reliving the life of a Jewish person in an internment camp.

One of the wonders of the spirit world is that as souls we are not limited by earthly concepts of reality in terms of past, present and future and the role we may have played the first time around. During our lives on earth we are often troubled by the "what if's" of our choices and much is clouded in mystery in the conscious state. I make the statement on Page 169 in DS, "who is to say an altered reality does not simultaneously exist for all events where both origins and outcomes are interchangeable?" During the long years of my research I have found that information I received about spirit world reality between lives in the second half of the 20th century is now being studied in the first part of the 21st century by theoretical physicists using new approaches with Quantum Mechanics vs. the old classical mathematical models. As I write this position paper in 2014 for our Archives I would like to approach this subject first through current cosmology.

I will begin by quoting Laszio's view of the cosmos through the eyes of modern empirical sciences. "Studies of interaction create interconnection and produces instant and multifaceted coherence." Now, I know this is a mouthful but coherence simply means that what happens to one particle in spacetime also happens to the other particles on a cosmic wave of electromagnetic force. The whole system is influenced and thus becomes an integral whole. This level of coherence indicates that from the largest structures of the cosmos to the smallest molecules are completely interconnected.

PAST, PRESENT AND FUTURE ALL IN “NOW” TIME WITH LBL

THOUSANDS OF LBL CASE STUDIES HAVE DEMONSTRATED THAT EVENTS FROM PEOPLE’S PAST LIVES CAN BE REVISTED BY SOULS IN THEIR LIFE BETWEEN LIVES IN A VARIETY OF SETTINGS. THIS WOULD INCLUDE PRIVATE STUDY IN THE LIBRARY, REVIEWS WITH PERSONAL SPIRIT GUIDES, OR DURING COUNCIL MEETINGS. APPARENTLY, WE LEAVE IMPRESSIONS OF OUR OWN SPECIFIC VIBRATIONAL ENERGY ON ALL MATERIAL OBJECTS IN THOSE GEOGRAPHICAL LOCATIONS WHERE OUR PRESENCE HAS BEEN PERMANENTLY RECORDED.

IN SPIRITUAL AREAS WHEN WE ARE IN THE SOUL STATE, THE POTENTIAL FOR FUTURE POSSIBILITIES AND PROBABALIES WITH EVENTS CAN BE REVIEWED IN AREAS OF LIFE SELECTION. OUR BODY AND LIFE CHOICES ARE, HOWEVER, BASED UPON KARMIC FREE WILL AND NOT ON DETERMANISTIC FATE. THE AFTERLIFE DOES NOT FUNCTION UNDER THE LAWS OF PHYSICAL LINEAR TIME.

FROM NEW STUDIES IN QUANTUM MECHANICS WE CAN HYPNTHIZE THAT SUBATOMIC PARTICLES—ACTING UNDER THE INFLUENCE OF PURE VIBRATIONAL ENERGY WAVES—HAVE THE CAPACITY TO CREATE A MULTITUDE OF ALTERNATIVE PATTERNS OF FUTURE EVENTS JUST AS ENERGY PARTICLES ALSO RECORD IMAGES, BOTH ANIMENT AND INANIMENT, OF PAST EVENTS.

THUS, IT WOULD SEEM THAT IN THE ‘NOW’ TIME OF BOTH OUR SPIRITUAL AND PHYSICAL EXISTENCES NO ENERGY INVOLVING EVENTS IS EVER LOST THAT CAN NOT BE RECOVERED BETWEEN LIVES FOR ANALYSIS. PAST, PRESENT AND FUTURE EXIST IN ONE CONTINIUM.

MORE THOUGHTS ON THE MEANING BEHIND WHY EVENTS NEVER DIE AND THE ULTIMATE IMPLICATIONS OF "NOW TIME."

When people see "apparitions" involving specters, ghosts or phantoms on our planet what do these emotionally charged visions really mean? On land we may see the re-enactment of past battles involving death and other scenes of murders and suicides while on the sea people might see ghost ships, sinking's, shipwrecks and in the air, plane crashes, etc. On the other hand we might see people, now gone, who come to us in times of torment perhaps on a mission of comfort in certain places.

In past life regression people in deep hypnosis may actually re-live events in which they participated in some way releasing powerful emotions such as love, hate, pain, despair and happiness. The energy from these events still live within us and, in fact, may be studied for karmic implications in the spirit world. Often, the common denominator here is a traumatic death but our physical emotions add to the rhythms of the soul.

The matter of sounds and materializations adds to the mystery of these visions in current time. I would suggest that the energy vibrations that create the imagery regarding both animate and inanimate objects in the reality of now time may seem to have origins that emanate from our eyes and ears when actually all our senses and perceptions are impacted through the soul mind with our current brain. While we might label these visions as alternate realities this is an unnecessary restriction to the power of the soul.

At this stage in cosmic science the label of molecules, atoms and subatomic particles have been assigned to all things material which has led to quantum multiverse theories and the search for truth in unified field theory continues. In LBL investigation we have no such restrictions. Linear observations by humans is deceptive. Someday, science will find that atoms of matter obey a multiverse theory where they can exist in two or more places at once without regard to time.

What LBL methodology has shown already in just a few years is that highly intelligent soul energy records all impressions of our involvement with events anywhere at any time period. Like a fingerprint, the vibrations of each soul energy is unique and these vibrational threads between physical beings, objects and environments are not destroyed by the passage of time. There are no limitations between time and space with souls. Even so, our hypnosis investigations have limits because of one important factor.

Every soul we work with has the selectively refined energy influence of higher beings such as guides and council members who in turn are orchestrated by even higher powers that we call Oversouls. These are all threads of connected intelligence. This great mystery is difficult to approach from an LBL analysis of one still-reincarnating soul.
